Chapter 5	Perfection(with annotation)pdf	17-24

The Hindu Editorial Vocabulary

Vocabulary:

1. Inundate (प्रवाहित करना)

Meaning: To overwhelm with a large amount of something, especially water.

2. Scrupulous (सत्कर्म, अनुशठावान)

Meaning: Very careful and thorough in doing something, especially regarding moral integrity.

3. Connivance (साजिश, मिलीभगत)

Meaning: Willingness to secretly allow or be involved in wrongdoing.

4. Byzantine (जटिल, उलझा हुआ)

Meaning: Very complex or intricate, especially in structure or administration.

5. Conundrum (पहेली, उलझन)

Meaning: A confusing or difficult problem or question.

6. Felicitated (सम्मानित किया)

Meaning: To praise or honor someone, especially publicly.

7. Inevitable (अपरिहार्य)

Meaning: Certain to happen; unavoidable.

8. Banal (साधारण, नीरस)

Meaning: Lacking originality or freshness; dull.

9. Scrutiny (परीक्षण, जांच)

Meaning: Careful and thorough examination or inspection.

10. Unleash (रिहा करना, खोलना)

Meaning: To release or set something free, often something powerful or destructive.

PHRASAL VERBS:

1. Hand in
Meaning: to give something to someone in a position of authority

2. Cut in
Meaning: interrupt someone while they are speaking

3. Break out
Meaning: to begin, or to begin using or doing something / a violent escape, especially by a group

4. Turn up
Meaning: to arrive; to appear

Idioms & Phrases

1. Be in the swim
Meaning: To keep oneself informed and up-to-date

2. Can’t cut the mustard
Meaning: Someone who is not adequate enough to compete or participate

3. Variety is the spice of life
Meaning: New and exciting experiences make life more interesting

4. Wag the dog
Meaning: To change the topic from something that is more important to something that is not

5. Thumb one's nose
Meaning: A gesture of disrespect

Articles (Reading & Skimming)

Article for Reading:

Burrow tragedy: on the coal mining tragedy in Assam's Dima Hasao

With four deaths so far, the coal mining tragedy in Assam's Dima Hasao district has revived a long-standing debate on the hazardous nature of rat-hole coal mining in India. As opposed to modern coal mining, which is mechanised, the 'rat-hole' points to the crude and antiquated technique of employing people, and even children, to burrow into the ground to scoop out the underground coal. Depending on the depths that they plumb, the odds are high that their pickaxes will often unleash a torrent of water from a hidden aquifer that can suddenly inundate the excavated tunnel — as it is suspected to have happened at Dima Hasao. Because such accidents have recurred over the decades, along with the attendant health and environmental hazards, this mode of mining was banned by the National Green Tribunal (NGT) in 2014. The use of proper geological surveys and appropriate machinery would have made the mine economically unviable. The Assam Chief Minister has stated that the mine appeared to be "prime facie... illegal" and one abandoned by the State's Mines and Minerals Department. If that is the case, it reflects poorly on the State administration that such mines can be exploited by unscrupulous elements with such ease, despite the ban. Surely, this is only a fraction of the unregulated mining that actually goes on. The Supreme Court of India, in 2019, had asked whether it was possible for such mining to continue without the "connivance" of officials, when it was examining the rescue of 15 miners trapped in a rat-hole mine in the East Jaintia Hills in December 2018. A report submitted by a monitoring committee set up by the NGT observed that despite the ban, the demand for coal to power cement manufacturing and thermal power plants in the northeast had sustained and supported rat-hole coal mining. On the other hand, when convenient, State authorities have sought out and even felicitated rat-hole miners, some from Assam, as in 2023, when they were called in as a last resort after advanced machinery and the

expertise of professional geologists and earth scientists had failed to rescue 41 construction workers trapped in the large, over-ground Silkiyara tunnel in Uttarkashi. The Dima Hasao operation too, like others, will end and the net success or failure of saving those trapped will induce a familiar amnesia that will be broken only by the next accident. Until decisive action to puncture the economics of rat-hole mining is taken, India is only burrowing the way to another tragedy.

How Much Supervision Should Companies Give AI Agents?

We are witnessing a revolutionary shift from basic AI chatbots to true cognitive agents — systems that can think strategically, plan, and learn from their successes and failures. However, if we always put humans in the loop, we are unlikely to attain the true benefits of AI transformation. So, how much freedom should we grant AI agents? Surprisingly, the answer is about more than how big the risks are; it's about how well we understand those risks. Too little latitude, and the agent's capabilities are constrained to answering basic questions. Too much autonomy, and brand, reputation, customer relationships, and even financial stability are at risk. One approach is to wait until a general regulatory and commercial consensus on agentic AI emerges. Alternatively, for those bold enough, uncertainty can be harnessed as a decision rule for knowing what to do next. AI agents are systems for taking action. Unlike chatbots, they use large language models to orchestrate complex problem-solving activities involving planning, reasoning, and even interactions with other AI agents. Think of them as highly efficient virtual co-workers or a form of digital labor. Billions of them will soon join the workforce and will materially change the output of companies. The purpose of an AI agent is to get something done — such as an employee requesting a leave of absence, a sales assistant engaging a valued retail client with personalized recommendations, or

a pharmaceutical executive prioritizing the best candidates to recruit for a clinical trial. AI agents can become a control layer around all kinds of transactions, replacing many of the complex interfaces and byzantine workflows that characterize enterprise software platforms. Their simplicity and usefulness will be a direct challenge to both traditional software-as-a-service vendors, as well as to technology leaders unprepared for their rapid proliferation. Despite the anxiety around the arrival of artificial general intelligence (AGI), there may be more to fear from these relatively banal systems that will soon make millions of micro-decisions that impact our daily lives and work. Agent autonomy is a conundrum. You lose your productivity gains if you impose excessive supervision. Yet, in many cases, supervision is precisely what is needed to avoid disaster. Since the emergence of generative AI, there have been sufficient examples of algorithmic anarchy to make leaders wary — from an auto dealer chatbot offering a brand new car for a dollar, to an airline that was held liable for policies its AI chatbot hallucinated that did not exist. To avoid that problem, organizations are building AI agents that connect directly to internal systems and data, and new standards are emerging. That is a double-edged sword. Agents may be less likely to make things up if they're relying on internal systems and data. But, as they become more trusted, they will also have a growing influence over life-altering actions such as approving home loans, allocating social security, protecting critical infrastructure from cyberattacks, hiring or firing staff, or even controlling lethal weapons systems.

Descriptive Writing (Precis writing:
 & Email Writing)

Precis writing:

Original Text: Education is a fundamental pillar of personal growth and societal advancement. It empowers individuals with knowledge, critical thinking skills, and ethical values necessary for navigating life's challenges and making informed decisions. Education enhances intellectual and emotional development, fostering qualities like discipline, empathy, and resilience, which are essential for personal fulfillment and meaningful contribution to society. It also cultivates creativity and problem-solving abilities, enabling individuals to adapt and thrive in an ever-evolving world. On a broader scale, education plays a transformative role in society. It bridges socio-economic gaps, reduces inequality, and creates pathways for upward mobility. By fostering understanding and tolerance, it builds connections among diverse groups, promoting social harmony and unity. Moreover, education equips people with the tools to address pressing global challenges such as poverty, climate change, and health crises, encouraging innovative solutions and collective responsibility. Education is not just a means to individual success but a critical driver of societal progress. It fuels economic growth by preparing skilled professionals and entrepreneurs who contribute to industries and innovation. It also strengthens democracy by empowering individuals to engage actively in civic life and advocate for equitable policies. Furthermore, education nurtures responsible leadership, ensuring that future generations can lead with integrity and purpose. As a long-term investment, education lays the foundation for sustainable progress,

fostering a society where opportunities are accessible to all. It not only prepares individuals for professional success but also cultivates informed, compassionate, and active citizens capable of shaping a better and more inclusive future. In essence, education is the cornerstone of human potential and the key to building a just and prosperous world.

Precis :

Education is the foundation of personal development and societal progress. It equips individuals with knowledge, critical thinking, and problem-solving skills necessary to navigate life's challenges. Beyond academic learning, education fosters emotional growth and values such as empathy, discipline, and resilience, enabling people to contribute meaningfully to their communities and adapt to a rapidly changing world. At a societal level, education plays a transformative role by reducing inequality and offering opportunities for upward mobility. It bridges gaps among diverse groups, fostering understanding, tolerance, and social harmony. Education empowers individuals to address global challenges such as poverty, climate change, and public health crises, encouraging innovative solutions and collective action. Economically, education drives growth by preparing skilled professionals and entrepreneurs who fuel industries and innovation. It strengthens democratic systems by creating informed citizens who actively engage in civic life, advocate for equitable policies, and hold leaders accountable. Furthermore, education nurtures responsible leadership, ensuring future generations are equipped to lead with integrity and purpose.

- **You are the HR of your office, ABC Ltd. Write an email informing your employees about the change in office timings for the winter season due to heavy fog.**

To:
abcltd.team@gmail.com
Subject: Change in Office Timings for Winter Season
Dear Team,
I hope this message finds you well. Due to the heavy fog during the winter season, we have decided to adjust our office timings to ensure everyone's safety and convenience. Starting from [date], the new office hours will be as follows: Start Time: [new start time] End Time: [new end time] We kindly request all employees to adhere to the revised schedule. Please plan your commute accordingly and prioritize safety while traveling. If you have any concerns or require further clarification, feel free to reach out to the HR department. Thank you for your cooperation.
Best regards,
[Your Name]
HR Manager
ABC Ltd.

Perfection Vocab

- **Deferred** – Postponed or delayed.
- **Pressing** – Urgent or requiring immediate attention.
- **Demand** – A strong request or requirement.
- **Aggregators** – Platforms that gather services or products from various sources.
- **Contentious** – Likely to cause disagreement or controversy.
- **Rate rationalisation** – Adjustment or restructuring of tax rates.
- **Sought** – Attempted or asked for.
- **Extension** – Additional time or a continuation.
- **Penal** – Relating to punishment or penalties.
- **Levied** – Imposed or charged (as in taxes).
- **Fortified** – Strengthened or enriched, often with nutrients.
- **Kernels** – Seeds or grains, often referring to corn.
- **Clarifications** – Explanations or simplifications.
- **Framework** – A structured system or guideline.
- **Pre-packaged** – Prepared and sealed in advance for sale.
- **Categorisation** – The act of grouping or classifying items.
- **Oddity** – Something unusual or peculiar.
- **Indirect** – Not straightforward; secondary or implied.
- **Classification** – The process of arranging or organizing into groups.
- **Compliance** – Adherence to rules or standards.
- **Distinction** – A difference or contrast.
- **Packed** – Contained or enclosed within a package.
- **Frozen** – Preserved at a very low temperature.
- **Parathas** – A type of Indian flatbread.
- **Rotis** – Traditional Indian unleavened bread.
- **Framework** – A system or structure.
- **Slabs** – Fixed levels or rates, especially in taxation.
- **Stand out** – To be noticeable or unique.
- **Countries** – Nations or states.

- **Compliance burden** – Difficulty or cost of adhering to rules.
- **Space** – Scope or opportunity.
- **Bureaucratic** – Relating to administrative procedures or officials.
- **Discretion** – Freedom to decide or act on one's own.
- **Desire** – A strong wish or aspiration.
- **Taxed** – Subjected to a financial charge or duty.
- **Pre-packaged** – Packed and labeled before sale.
- **Levy** – A legal imposition of a tax or fee.
- **Update** – A report or summary of recent developments.
- **Burden** – A heavy load, physically or figuratively.
- **Structure** – The arrangement or organization of elements.
- **Obsolete** – Outdated or no longer in use.
- **Encapsulate** – To summarize or enclose in a concise form.
- **Redundant** – Unnecessary or repetitive.
- **Encompass** – To include or surround completely.
- **Diminishing** – Decreasing or reducing.
- **Convey** – To communicate or transport.
- **Gravitation** – Attraction or pull, especially toward something.
- **Perpetuation** – The act of continuing or prolonging something.
- **Inclination** – A tendency or preference.
- **Extinction** – The state of no longer existing.
- **Momentum** – Force or speed gained by movement.
- **Sustenance** – Means of support, nourishment, or survival.
- **Vernacular** – The language spoken by ordinary people.
- **Acknowledged** – Recognized or accepted.
- **Dominant** – Most powerful or influential.
- **Relegated** – Assigned to a lower rank or position.
- **Foreign** – From another country or unfamiliar.
- **Exalted** – Highly praised or elevated.
- **Invaluable** – Extremely valuable or important.
- **Arcane** – Mysterious or known to only a few.
- **Profound** – Deep or meaningful.

- **Esoteric** – Understood by a select few.
- **Indispensable** – Absolutely necessary.
- **Convoluted** – Complex or complicated.
- **Paradox** – A statement that seems contradictory but may be true.
- **Ubiquitous** – Present everywhere.
- **Fallacy** – A mistaken belief or error in reasoning.
- **Notion** – An idea or belief.
- **Misinterpretation** – A misunderstanding or incorrect explanation.
- **Paramount** – Most important or supreme.
- **Entrenched** – Firmly established.
- **Advocating** – Supporting or recommending.
- **Ingrained** – Deeply fixed or rooted.
- **Preserving** – Maintaining or keeping safe.
- **Woven** – Interconnected or intertwined.
- **Disregarding** – Ignoring or paying no attention to.
- **Driving one crazy** – Making someone very annoyed or frustrated.
- **Getting a kick out of something** – Enjoying or being amused by something.
- **Hitting the nail on the head** – Saying or doing exactly the right thing.
- **Burning the midnight oil** – Working late into the night.
- **Sticking one's neck out** – Taking a risk to support someone or something.
- **Easier said than done** – Simple to say but difficult to do.
- **Rome wasn't built in a day** – Important things take time to complete.
- **Rain or shine** – No matter what the circumstances are.
- **Brush up on something** – Refresh your knowledge or skills in something.
- **All in the same boat** – In the same difficult situation as others.
- **Go against the grain** – To do something unusual or against

normal expectations.

- **Make a mountain out of a molehill** – Exaggerate a small problem.
- **Count your chickens before they hatch** – Assume success too early.
- **Drop in the bucket** – A very small or insignificant amount.
- **Fall for it** – Believe something that isn't true.
- **Put all your eggs in one basket** – Risk everything on a single venture.
- **Sleep like a baby** – Sleep very well.
- **Make a long story short** – Summarize or condense a story.
- **Miss the boat** – Miss an opportunity.
- **Fly off the handle** – Lose one's temper suddenly.
- **Actions speak louder than words** – What you do is more important than what you say.
- **Do not cry over spilt milk** – Don't stress over something that can't be changed.
- **Between a rock and a hard place** – Stuck between two difficult choices.
- **Giving someone the cold shoulder** – Ignoring someone deliberately.
- **Killing two birds with one stone** – Solving two problems at once.
- **Compare apples to oranges** – Compare two completely different things.
- **Go on a wild goose chase** – Pursue something that is hard or impossible to find.
- **Break the ice** – Start a conversation or activity to reduce tension.
- **Bark up the wrong tree** – Focus on the wrong issue or target.
- **Start small and build up** – Begin with small efforts and gradually increase.

- **Play devil's advocate** – Argue against an idea to test its strength.
- **Bite off more than you can chew** – Take on more than you can handle.
- **Spill the beans** – Reveal a secret.
- **Take a rain check** – Postpone an offer or invitation.
- **Calm before the storm** – A peaceful period before chaos.
- **Fit as a fiddle** – Very healthy and energetic.
- **Throw caution to the wind** – Act recklessly or without care.
- **Through thick and thin** – Support someone in good and bad times.
- **Cross that bridge when you get to it** – Deal with a problem only when it happens.
- **Off the top of my head** – Without much thought or preparation.
- **Reap what you sow** – Face the consequences of your actions.
- **Go down in flames** – Fail spectacularly.
- **Put something on ice** – Delay or postpone something.
- **Leave no stone unturned** – Explore all possible options.
- **Look before you leap** – Think carefully before taking action.
- **It's not rocket science** – It’s not very complicated or difficult.
- **A blessing in disguise** – Something bad that turns out to be good.
- **Shape up or ship out** – Improve or leave.
- **Do not beat a dead horse** – Stop wasting time on something that’s already settled.
- **Slow and steady wins the race** – Consistent effort leads to success.

Perfection(with annotation)pdf

postponed

In its 55th meeting, the GST council deferred taking a decision on several pressing issues. These included the demand __(m)__ and on the food delivery charges of platform aggregators. Alongside, the Group of Ministers (GoM) looking into the contentious issue of rate rationalisation sought more time, while another looking into _(n)__ an extension. While there were other recommendations by the council on penal charges levied by financial institutions, fortified rice kernels and the sale of used cars, some of the clarifications that it did provide only served _(o)_ under the Goods and Services Tax. The council clarified that popcorn with salt and spices would be taxed at 5 per cent GST. If it is pre-packaged and labelled the tax would be levied at 12 per cent. And if it is mixed with sugar then at 18 per cent. This oddity, however, is not a one-off. Under this indirect tax framework, there are numerous examples of classification and categorisation of goods and services _(p)_. For instance, a few months ago, D Srinivasan, Managing Director of Coimbatore's Annapoorna Hotels, had raised the issue of the difference rates at which buns and cream buns were taxed. In the past, a distinction has also been drawn been packed/frozen parathas and rotis. India stands out as one of the few countries _(q)_. Of 115 countries, only five – Ghana, India, Italy, Luxembourg and Pakistan – have four or more GST slabs as per the World Bank's India Development Update 2018. Twenty-eight had two rates, while 49 levied a single rate. A multiple-level rate structure only raises the compliance burden, increases the space for bureaucratic discretion,

1. where different tax rates are imposed
2. to improve the ease of doing business in the country
3. the matter of the compensation cess was also given
4. with such a complex indirect tax structure
5. for lowering the tax on health and life insurance
6. to highlight the oddities of the multiple rate structure

Annapoorna Hotels, had raised the issue of the difference rates at which buns and cream buns were taxed. In the past, a distinction has also been drawn been packed/frozen parathas and rotis. India stands out as one of the few countries __(q)___.Of 115 countries, only five – Ghana, India, Italy, Luxembourg and Pakistan – have four or more GST slabs as per the World Bank's India Development Update 2018. Twenty-eight had two rates, while 49 levied a single rate. A multiple-level rate structure only raises the compliance burden, increases the space for bureaucratic discretion, and goes against the desire __(r)___

1. where different tax rates are imposed
2. to improve the ease of doing business in the country
3. the matter of the compensation cess was also given
4. with such a complex indirect tax structure
5. for lowering the tax on health and life insurance
6. to highlight the oddities of the multiple rate structure

Aman: Have you ever wondered about the significance of preserving local dialects and languages?
Ishita: Of course, but I often feel that in today's globalized world, their relevance is __(m)__. Wouldn't it be more pragmatic to focus on learning widely spoken languages instead?
Aman: That's a valid point, but local dialects are not just means of communication; they __(n)__ centuries of culture and tradition. Losing them is akin to losing a part of our history.
Ishita: True, but how do we ensure their survival when there's a constant _(o)__ towards homogenization? People are naturally inclined to adopt languages that offer better opportunities.
Aman: That's where the role of education comes in. By integrating regional languages into the curriculum, we can instill pride and ensure their _(p)__. Efforts at the grassroots level are equally important.
Ishita: I see your point, but the challenge lies in getting people to value them when __(q)__ languages are often perceived as more prestigious.
Aman: Precisely. It's about changing the narrative and fostering an environment where linguistic diversity is celebrated, not merely __(r)___ .
Ishita: That sounds idealistic, but how do you envision such a shift in attitudes happening on a large scale?
Aman: It starts with initiatives that showcase the richness of these dialects—literature, films, and even technology can play a role. When people see their languages being used innovatively, they'll understand their value. Plus, languages that seem _(s)_ at first glance often contain remarkable depth, even if they may appear __(t)_ to outsiders.
Ishita: I suppose such efforts could make a difference. But don't you think there's a _(u)_ that older generations value these dialects more than younger ones? That makes it harder to pass them on.
Aman: That's a common _(v)__. While older generations have a deep connection to these languages, younger people can be just as invested if given the right opportunities to engage with them. We need to make these dialects relevant in today's world.
Ishita: So, what would be the first step in making this happen?
Aman: It would involve ensuring that these languages are __(w)__ into everyday life. Public campaigns, community workshops, and integration into entertainment and education are great ways to start. It's also about creating resources that make learning these languages engaging and worth _____(x)_____.

Aman: Have you ever wondered about the significance of preserving local dialects and languages?
Ishita: Of course, but I often feel that in today's globalized world, their relevance is __(m)__. Wouldn't it be more pragmatic to focus on learning widely spoken languages instead?
Aman: That's a valid point, but local dialects are not just means of communication; they __(n)__ centuries of culture and tradition. Losing them is akin to losing a part of our history.

A. Only a
B. Both a and b
C. Only b
D. Both b and c
E. All of a, b, and c

Questions 7: Which of the following appropriately fits in **Option m** and **Option n** respectively?

a) obsolete, encapsulate
b) redundant, encompass
c) diminishing, convey

Ishita: True, but how do we ensure their survival when there's a constant **_(o)__** towards homogenization? People are naturally inclined to adopt languages that offer better opportunities.

Aman: That's where the role of education comes in. By integrating regional languages into the curriculum, we can instill pride and ensure their **_(p)__**. Efforts at the grassroots level are equally important.

Question 8: Which of the following appropriately fits in **Option o** and **Option p** respectively?

a) gravitation, perpetuation
b) inclination, extinction
c) momentum, sustenance

A. Only a
B. Both a and c
C. Only b
D. Both b and c
E. All of a, b, and c

Ishita: I see your point, but the challenge lies in getting people to value them when **__(q)__** languages are often perceived as more prestigious.

Aman: Precisely. It's about changing the narrative and fostering an environment where linguistic diversity is celebrated, not merely **__(r)__**.

a) entrenched, advocating
b) ingrained, preserving
c) woven, disregarding

A. Only a
B. Both a and b
C. Only b
D. Both b and c
E. All of a, b, and c

Achieving long-term success is not a matter of quick wins, but about staying the course and putting in consistent effort day after day. It's easy to feel like you're just __(A)__, especially when results seem slow to appear, but patience and perseverance are essential. As the saying goes, "__(B)__ ," and it's important to remember that great things take time. In those moments when you feel like you're at a crossroads or staring down the barrel of a challenge, keep in mind that you can't __(C)___ . Success doesn't arrive before its time, and you must trust the process. When you're building something, whether a career, a skill, or a relationship, remember not to __(D)__ . Diversifying your efforts ensures that if one path doesn't work out, you have others to fall back on. Of course, there will be times when you feel like you're __(E)__, but those moments are just part of the journey. Stay the course and keep taking small steps toward your goal, because in the end, it's better to __(F)_ than to _(G)__. If you ever feel overwhelmed, don't panic—just __(H)__. Worrying about the future won't help today's progress. The key to success is consistency: keep putting in the effort, and you'll_(I)__. Even when the road gets tough, remember that __(J)__ .

It's easy to feel like you're just **__(A)___**, especially when results seem slow to appear, but patience and perseverance are essential.

Question 11:

Which of the following best fits in **Option A?**

(a) driving one crazy

(b) getting a kick out of something

(c) hitting the nail on the head

(d) burning the midnight oil

(e) sticking one's neck out

As the saying goes, "**___(B)__**," and it's important to remember that great things take time.

Question 12:

Which of the following best fits in **Option B?**

(a) Easier said than done

(b) Rome wasn't built in a day

(c) Rain or shine

(d) Brush up on something

(e) All in the same boat

In those moments when you feel like you're at a crossroads or staring down the barrel of a challenge, keep in mind that you can't **__(C)____** . Success doesn't arrive before its time, and you must trust the process.

go against normal things

Question 13: do something that is not normal

Which of the following best fits in **Option C?**

→ exaggerate

assume

before it has happened

(a) go against the grain

(b) make a mountain out of a molehill

(c) count your chickens before they hatch

very less

(d) drop in the bucket

(e) fall for it

deceive, trick

fall in love

When you're building something, whether a career, a skill, or a relationship, remember not to **___(D)____** . Diversifying your efforts ensures that if one path doesn't work out, you have others to fall back on.

not diversify

Question 14:

Which of the following best fits in **Option D?**

(a) put all your eggs in one basket

(b) sleep like a baby

have a sound sleep

(c) make a long story short

summarise

(d) miss the boat

miss the opportunity

(e) fly off the handle

become very angry

Of course, there will be times when you feel like you're ____**(E)**____, but those moments are just part of the journey.

Question 15:

Which of the following best fits in **Option E?**

(a) actions speak louder than words

(b) do not cry over spilt milk

(c) between a rock and a hard place

(d) giving someone the cold shoulder

(e) killing two birds with one stone

steps toward your goal, because in the end, it's better to __**(F)**___ than to __**(G)**__.

Question 16:

Which of the following best fits in **Option F?**

(a) compare apples to oranges

(b) go on a wild goose chase

(c) break the ice

(d) bark up the wrong tree

(e) start small and build up

steps toward your goal, because in the end, it's better to __(F)__ than to __(G)__.

Question 17:

Which of the following best fits in **Option G?**

(a) play devil's advocate

(b) bite off more than you can chew

(c) spill the beans

(d) take a rain check

(e) calm before the storm
