NIMISHA BANSAL

Direction (1-10): In the following questions two columns, Column 1 and Column 2 are given with three sentences/ phrases each. Column 1 consists of sentences/ phrases A, B and C whereas Column 2 consists of sentences/ phrases D, E and F. Each question consists of five options, four of which display the possible sequence in which the given sentences/phrases can be joined to form a grammatically and contextually correct sentence. If no option provides with a correct sentence after combination, mark (e), i.e. "None of these" as your answer.

Question 1:

Column A	Column B
A) In a world where meetings have become an omnipresent fixture of modern professional life, there	D) the conclusion marks the primal joy of realising that it is only when something ends that something valuable can start.
B) As participants disperse, there is a palpable sense of liberation as individuals can finally return to	E) the room or video conferencing palace it signals the end of an often time-consuming and sometimes meandering discourse.
C) Freed from the obligations of participation, attendees can regain control over their schedules and allocate their time the best way	F) exists an underappreciated aspect to them the utter pleasure derived in the conclusion of these gatherings.

A. A-F, C-D
B. A-E, B-D and C-F
C. Only B-D
D. A-F, B-E and C-D
E. None of these

Question 2:

Column A	Column B
A) In the long term, the skills need of the AI-powered economy of the future is harder to predict that is	D) why businesses and government should work together on a long-term strategy that puts training in digital skills and lifelong learning at the core.
B) As a country, we have huge potential to grow as an AI superpower, and I'm sure this is the start of a trend which will see more and more companies looking to take	E) advantage of the UK's deep tech expertise, and the UK benefiting from the investment and innovation that this will bring.
C) Generative AI - artificial intelligence which can create media based on text prompts - continues to be a target of investment for big firms	F) by analysing a massive amount of data often sourced online and people are concerned it draws on their copyrighted work.

A. A-F, C-D
B. A-E, B-D and C-F
C. A-D, B-E
D. A-F, B-E and C-D
E. None of these

Question 3:

Column A	Column B
A) The Indian agri-tech firm works with 200,000 farmers, owns 412 distribution centres and has invested in	D) fresh fruit, vegetables, nuts, spices, dairy products flow through its network every day.
B) We employ technology to predict retailer orders, optimise collection centres, and set target prices, making supply chains efficient, and	E) natural disasters like cyclones, and floods that disrupt transportation routes and damage facilities," says Varun Raheja, founder of Raheja Solar Food Processing.
C) Farmers throw away large amounts of fruits	F) raised hundreds of millions of dollars to build

and vegetables because of a lack of infrastructure, limited processing capacity	its network, and plans to be profitable by 2025.

A. A-F, C-D
B. Only C-E
C. A-D, B-E
D. A-F, B-E and C-D
E. None of these

Question 4:

Column A	Column B
A) One of 25 worldwide atmospheric stations, the cliff-top Cape Grim Baseline Atmospheric Pollution Station (CGBAPS) was created in 1976 to	D) collect and analyse the composition of this pristine air, which is unaffected by local pollution sources such as exhaust fumes or industrial smoke.
B) The station also plays an integral part in the world's climate change research, chronicling stratospheric ozone depletion as well valuable	E) weather and climate information such as temperature, rainfall, wind, humidity and solar radiation.
C) When the public got wind of these air samples being collected, offers came in from people who had scuba tanks in their garages their donations of	F) air samples from these tanks means there's now an air history from the region dating back to 1956.

A. A-F, C-D
B. Only C-E
C. A-D, B-E
D. A-D, B-E and C-F
E. None of these

Question 5:

Column A	Column B
A) All three of these atmosphere-analysing telescopes make use of a technique, used by chemists for hundreds of years, to	D) light from the atmosphere of a planet orbiting a star, hundreds of light years away.
B) The planet is in what astronomers call "the Goldilocks zone' - the right distance away from its star	E) which a planet orbits that means it will be able to spot and sample the atmospheres of planets similar to our own.
C) Nasa is planning the Habitable Worlds Observatory (HWO), scheduled for the 2030s using what is effectively a high-tech sunshield, it minimises light from the star	F) for the surface temperature to be neither too hot nor too cold, but just right for there to be liquid water, which is essential to support life.

A. A-F, C-D
B. Only C-E
C. B-F, C-E
D. A-D, B-E and C-F
E. None of these

Question 6:

Column A	Column B
A) Most antimatter exists only fleetingly in the Universe, for fractions of seconds	D) so to carry out experiments, the Cern team needed to make it in a stable and long-lasting form.
B) The researchers at Cern have now confirmed, with the greatest degree of certainty yet, that Einstein was right	E) in his General theory of Relativity more than a hundred years ago, say it should behave just like matter, and fall downwards.

C) The antiprotons and positrons are then sent into a giant magnet,	F) where they mix to form thousands of atoms of antihydrogen.

A. A-D, C-D
B. Only C-E
C. A-D, C-F
D. A-D, B-E and C-F
E. None of these

Question 7:

Column A	Column B
A) The 2023 Nobel Prize in Physiology or Medicine has been awarded to Katalin Karikó and Drew Weissman for their research	D) devotees to be where Lord Ram, one of the most revered deities in Hinduism, was born.
B) Located in the holy city of Ayodhya in the electorally significant state of Uttar Pradesh, the temple's interiors will be adorned with gold bars and	E) rule of reservation with respect to the Scheduled Castes, Scheduled Tribes and Other Backward Class students.
C) The Madras High Court has ruled that educational institutions run by religious and linguistic minorities need not follow the	F) were awarded the prize for their "discoveries concerning nucleoside base modifications that enabled the development of effective mRNA vaccines against COVID-19".

A. A-D, C-D
B. Only C-E
C. B-F, C-E
D. A-D, B-E and C-F
E. None of these

Question 8:

Column A	Column B
A) In the heart of the enchanted forest, where the trees whispered ancient tales and the	D) air hummed with mystical energy, a young adventurer stumbled upon a hidden glade.
B) People from all walks of life gathered there, haggling with fervor and sharing	E) stories, creating a tapestry of cultures woven together by the spirit of trade.
C) With a cup of hot cocoa in hand, the traveler gazed through the frosted window, finding	F) solitude of the mountain cabin, a crackling fire warmed the cozy interior.

A. A-D, B-E
B. Only C-E
C. B-F, C-E
D. A-D, B-E and C-F
E. None of these

Question 9:

Column A	Column B
A) For Samsung and other tech companies, AI algorithms are crucial to delivering photos taken in the dark the AI training process is based on	D) when camera features have increasingly become a key selling point for smartphones that otherwise largely all look and feel the same from one year to the next.
B) Tech companies such as Apple, Samsung and Google are investing resources to improve their night photography options at a time	E) can look quite different from what the person taking the picture saw in real time, in what some might argue is a technical sleight-of-hand trick.
C) Algorithms identify the right level of exposure, determine the correct color pallet and gradient	F) a large number of images tuned and annotated by experts, and AI learns the parameters to adjust for every photo taken in

	low-light situations, Su explained.

A. A-F, B-D
B. Only C-E
C. B-F, C-E
D. A-D, B-E and C-F
E. None of these

Question 10:

Column A	Column B
A) Most companies want to use these large language models, but the really good ones take billions of dollars to train and	D) that “small and large companies can afford to train and run their LLMs in production.”
B) Amazon’s goal, according to Jassy, is to offer less costly machine learning chips so	E) then have the ability to customize it for their own purposes.
C) Amazon disclosed in a securities filing Thursday that Jassy’s pay package last year was valued at some $1.3 million, and	F) he was awarded a pay package mostly comprised of stock awards that valued his total compensation package at some $212 million.

A. A-F, B-D
B. Only B-D
C. B-F, C-E
D. A-D, B-E and C-F
E. None of these

ANSWER

1. Ans: A
Explanation: A-F: In a world where meetings have become an omnipresent fixture of modern professional life, there exists an underappreciated aspect to them the utter pleasure derived in the conclusion of these gatherings.

C-D: Freed from the obligations of participation, attendees can regain control over their schedules and allocate their time the best way the conclusion marks the primal joy of realising that it is only when something ends that something valuable can start.

2. Ans: C
Explanation: A-D: In the long term, the skills need of the AI-powered economy of the future is harder to predict that is why businesses and government should work together on a long-term strategy that puts training in digital skills and lifelong learning at the core.

B-E: As a country, we have huge potential to grow as an AI superpower, and I'm sure this is the start of a trend which will see more and more companies looking to take advantage of the UK's deep tech expertise, and the UK benefiting from the investment and innovation that this will bring.

3. Ans: B
Explanation: C-E: Farmers throw away large amounts of fruits and vegetables because of a lack of infrastructure, limited processing capacity natural disasters like cyclones, and floods that disrupt transportation routes and damage facilities," says Varun Raheja, founder of Raheja Solar Food Processing.

4. Ans: D
Explanation: A-D: One of 25 worldwide atmospheric stations, the cliff-top Cape Grim Baseline Atmospheric Pollution Station (CGBAPS) was created in 1976 to collect and analyse the composition of this pristine air, which is unaffected by local pollution sources such as exhaust fumes or industrial smoke.

B-E: The station also plays an integral part in the world's climate change research, chronicling stratospheric ozone depletion as well valuable weather and climate information such as temperature, rainfall, wind, humidity and solar radiation.

C-F: When the public got wind of these air samples being collected, offers came in from people who had scuba tanks in their garages their donations of air samples from these tanks means there's now an air history from the region dating back to 1956.

5. Ans: C
Explanation: B-F: The planet is in what astronomers call "the Goldilocks zone' - the right distance away from its star for the surface temperature to be neither too hot nor too cold, but just right for there to be liquid water, which is essential to support life.

C-E: Nasa is planning the Habitable Worlds Observatory (HWO), scheduled for the 2030s using what is effectively a high-tech sunshield, it minimises light from the star which a planet orbits that means it will be able to spot and sample the atmospheres of planets similar to our own.

6. Ans: C
Explanation: A-D: Most antimatter exists only fleetingly in the Universe, for fractions of seconds so to carry out experiments, the Cern team needed to make it in a stable and long-lasting form.

C-F: The antiprotons and positrons are then sent into a giant magnet, where they mix to form thousands of atoms of antihydrogen.

7. Ans: B
Explanation: C-E: The Madras High Court has ruled that educational institutions run by religious and linguistic minorities need not follow the rule of reservation with respect to the Scheduled Castes, Scheduled Tribes and Other Backward Class students.

8. Ans: A
Explanation: A-D: In the heart of the enchanted forest, where the trees whispered ancient tales and the air hummed with mystical energy, a young adventurer stumbled upon a hidden glade.

B-E: People from all walks of life gathered there, haggling with fervor and sharing stories, creating a tapestry of cultures woven together by the spirit of trade.

9. Ans: A
Explanation: A-F: For Samsung and other tech companies, AI algorithms are crucial to delivering photos taken in the dark the AI training process is based on a large number of images tuned and annotated by experts, and AI learns the parameters to adjust for every photo taken in low-light situations, Su explained.

B-D: Tech companies such as Apple, Samsung and Google are investing resources to improve their night photography options at a time when camera features have increasingly become a key selling point for smartphones that otherwise largely all look and feel the same from one year to the next.

10. Ans: B
Explanation: B-D: Amazon's goal, according to Jassy, is to offer less costly machine learning chips so that "small and large companies can afford to train and run their LLMs in production."
