<u>Match the column + Cloze Test</u> (New Pattern)

Direction (1-6): A paragraph is given below with three blanks. Phrases are provided below in the form of a 'Match the Following'. First, solve the 'Match the Following' to determine the consecutive pairs of phrases, which will then fit appropriately into the three respective blanks in the paragraph.

Passage I

The emergence and development of artificial intelligence (AI) in healthcare signifies one of the biggest shifts in modern medicine. From early diagnosis and detection to personalised treatment plans,__**(m)**__ However, to quote an oft-used line, "With great power comes an even greater responsibility." To make sure that innovation does not outpace accountability, especially in a field with as high stakes as healthcare where lives hang in the balance, the promise of transparency, ethics, and trust must anchor every step of the journey. Trust is the bedrock of healthcare, and accountability is how AI should ideally earn it here. Without these,__**(n)**__ .Picture this: Treatment for a critical illness is delivered by an AI system. Would you accept its judgement without knowing how it reached that conclusion? Transparency is essential for fostering trust in such high-stakes scenarios. A recent Wolters Kluwer survey found that 90% of consumers believe clinicians need to be transparent about their use of AI in healthcare decisions, underscoring the critical role of "explainability" in patient acceptance. Traceable AI systems ensure that every choice made is explainable, reproducible, and open to scrutiny. This isn't just about adhering to regulations like the European Union's (EU) AI Act or FDA guidelines for AI/machine learning in medical devices; __**(o)**__. Without transparency, AI risks turning into a "black box", which, in healthcare, is not just a technological challenge but also a moral imperative. The survey further noted that nearly four in five consumers are concerned about generative AI being used in medical diagnosis, reflecting the importance of accountability to mitigate errors and ensure ethical AI deployment.

Column I	Column II	Column III
(P) The promise that AI brings risks	**(S)** in a technology	**(V)** and unintended consequences
(Q) It is about building trust	**(T)** being overshadowed by doubt, inefficiency,	**(W)** new possibilities which look promising
(R) AI is pushing the limits	**(U)** of healthcare and opening up	**(X)** that is crucial for human health

S

Noun

Adj

RUW (+ve)

PTV (-ve)

QSX (Suggestive)

Question 1:

Solve the 'Match the Following' to determine the consecutive pairs of phrases that should appropriately fit into the given blanks.

(a) ~~PUW, QTV, RSX~~

(b) ~~PSV, QTX, RUW~~

(c) ~~PTV, QSW, RUX~~

(d) PTV, QSX, RUW

(e) ~~PUW, QSX, RTV~~

d

From early diagnosis and detection to personalised treatment plans,__**(m)**___.

Without these,__**(n)**__ .Picture this: Treatment for a critical illness is delivered by an AI system.

This isn't just about adhering to regulations like the European Union's (EU) AI Act or FDA guidelines for AI/machine learning in medical devices; __**(o)**__.

Question 2:

Based on the previous question, which of the following consecutive pairs should fit in the blanks (m), (n), and (o), respectively?

(a) (Q_,_), (R _, _), (P _, _)

(b) (R U,W), (P T,V), (Q S,X)

(c) (Q_,_), (P _, _), (R _, _)

(d) (P_,_), (R _, _), (Q _, _)

(e) (R_,_), (Q _, _), (P _, _)

Passage II:

The electric vehicle (EV) revolution has been lauded as a game-changer in the fight against climate change, promising to reduce carbon emissions and promote sustainable transportation. Governments worldwide are investing heavily in this transition through subsidies, policies, and infrastructure development. While EVs undoubtedly play a role in reducing emissions, the narrative surrounding their unblemished benefits deserves a closer look. __**(m)**__ Resource constraints, environmental implications, and socio-economic challenges raise questions about the long-term sustainability of this shift. At first glance, __**(n)**__. But this ignores the significant resource demands and environmental costs tied to their production, especially the manufacturing of lithium-ion batteries, their main engine. Lithium and cobalt, critical components of EV batteries, are extracted at a staggering environmental and social cost. Around 70% of the world's lithium reserves are concentrated in the "lithium triangle" of Argentina, Chile, and Bolivia, where mining operations are water-intensive, depleting resources in already arid regions. __**(o)**__. Reports of hazardous working conditions, child labour, corruption, and geopolitical tensions prevail in the dark underbelly of cobalt mining. The skyrocketing demand for these minerals risks triggering resource scarcity and "resource wars" as nations vie for economic power driven by fuel — whoever controls the fuel gains power.

Column I	Column II	Column III
(P) Cobalt, predominantly sourced	**(S)** from Congo, presents	**(V)** it is portrayed to be
(Q) EVs seem like an	**(T)** the EV revolution is not the panacea	**(W)** an equally troubling scenario
(R) An analysis reveals that	**(U)** environmental saviour,	**(X)** producing zero tailpipe emissions

Question 3:
Solve the 'Match the Following' to determine the consecutive pairs of phrases that should appropriately fit into the given blanks.

(a) PTX, QSV, RUW
(b) PUV, QTX, RSW
(c) PSW, QUX, RTV
(d) PSV, QUW, RTX
(e) PTW, QUX, RSV

While EVs undoubtedly play a role in reducing emissions, the narrative surrounding their unblemished benefits deserves a closer look. ___**(m)**_.

At first glance, __**(n)**__. But this ignores the significant resource demands and environmental costs tied to their production, especially the manufacturing of lithium-ion batteries, their main engine.

round 70% of the world's lithium reserves are concentrated in the "lithium triangle" of Argentina, Chile, and Bolivia, where mining operations are water-intensive, depleting resources in already arid regions. __**(o)**__.

Question 4:

Based on the previous question, which of the following consecutive pairs should fit in the blanks (m), (n), and (o), respectively?

(a) (P_,_), (Q _, _), (R _, _)

(b) (Q_,_), (R _, _), (P _, _)

(c) ~~(R_,_), (P _, _), (Q _, _)~~

(d) (P_,_), (R _, _), (Q _, _)

(e) (R_,_), (Q _, _), (P _, _)

e

Passage III Indian trade policy needs to prepare for navigating complex challenges in 2025. The challenges will arise from a combination of factors. These include President Trump's assumption of office as the US President; ___**(m)**___; possibilities of far-reaching political changes impacting trade with major partners; and a lower rate of domestic economic growth. President Trump's decisions on tariffs will impact prices of various exports to the US. For India too, ___**(n)**___. If Trump tariffs are levied on several of the US' major trading partners, then an interesting scenario will emerge where these partners will explore ways of circumventing tariffs for accessing the US market. The likely outcome, as already demonstrated by China, will be to relocate production to locations from which exporting to the US won't attract tariffs. India might need to explore similar options too. Tariffs will impact export competitiveness with US consumers finding the products becoming more expensive. The erosion of market access in the US will be compounded by slower economic growth in many parts of the world and its effect on demand for Indian exports. Some indications in this regard are already visible through lower growth of traditional "hot" Indian exports like gems and jewellery, and petroleum products.More political turbulence, including changes in governments in India's key export markets in Europe and West Asia, can further affect the prospects of exports. A projected lower level of domestic economic growth will impact capacity utilisation of manufacturing exports, which, as it is, will be impacted by the other mentioned changes. India's trade policy will need to adjust according to the challenges. One of the most important goals in this regard should be to make trade policy move out of its excessive focus on protecting interests of manufacturing exports. India's service exports are performing commendably. ___**(o)**___ .

Column I	Column II	Column III
(P) The tariffs will be meaningful	**(S)** work in tandem	**(V)** to encourage more service exports
(Q) A stagnation in global economic growth	**(T)** and consequent lower demand	**(W)** for manufacturing exports
(R) It is time that the trade policy and domestic industrial policy	**(U)** given that the US is	**(X)** its largest export market

Question 5:

Solve the 'Match the Following' to determine the consecutive pairs of phrases that should appropriately fit into the given blanks.

(a) PSW, QUV, RTX

(b) PUX, QTW, RSV

(c) PTX, QSV, RUW

(d) PSV, QTW, RUX

(e) PTX, QUV, RSW

These include President Trump's assumption of office as the US President; __**(m)**__; possibilities of far-reaching political changes impacting trade with major partners; and a lower rate of domestic economic growth.

President Trump's decisions on tariffs will impact prices of various exports to the US. For India too, ___**(n)**__.

India's service exports are performing commendably. __**(o)**__ .

I met a lot of people

Ram, cousins of Ramesh

, talented people of India who works day & night

Question 6:

Based on the previous question, which of the following consecutive pairs should fit in the blanks (m), (n), and (o), respectively?

Noun + A.J
Pronoun =

(a) (Q_,_), (R _, _), (P _, _)

~~(b) (R_,_), (P _, _), (Q _, _)~~

(c) (Q_,_), (P _, _), (R _, _)

~~(d) (P_,_), (R _, _), (Q _, _)~~

~~(e) (R_,_), (Q _, _), (P _, _)~~

2

to

that

Directions : Read the following set of sentences and answer the questions based on them.

A. In October 1869, James Gordon Bennett Jr., the vehemently anti-British, hard-drinking 28-year-old editor of the New York Herald, saw the tension between Great Britain and America as a means to boost the already astronomical circulation of 60,000 copies a day.

Noun

B. As America rebuilt following the Civil War, a rift developed with her old nemesis, Great Britain.

Pronoun

AC

C. Specifically, he hoped to exploit the fame and mystery surrounding British explorer Dr. David Livingstone, whose government had been apathetic about rescuing him.

A B C D E

~~A C B D E~~

D. Livingstone was in Africa to find the source of the Nile River.

E. Bennett decided Americans would do what the British would not.

FN SN

BACDE

Question 7

Which of the sentences in the above set should be interchanged to make the paragraph contextually correct?

A. A and B

B. B and E

C. C and D

D. A and C

E. B and C

Question 8

Which of the following sentences does not fit in the theme of the paragraph?

A. Explorers had looked for the source of the Nile since Herodotus attempted a search around 460 B.C., but as centuries passed and failures mounted, the quest took on an almost mythical heft.

B. No less than James Gordon Bennett Jr. had hoped, Stanley's finding of Livingstone—reported in the May 2, 1872, edition of the Herald under the headline "Livingstone Safe"—was an international sensation.

C. Often, African tribes raided other tribes and sold captives to slavers from Persia, Arabia, and Oman, whom Livingstone referred to collectively as "Arabs," in exchange for firearms.

D. Superpower Britain and the ascendant United States were at loggerheads over such issues as the sinking of the British-built warship Alabama, British claims of worldwide naval supremacy, Newfoundland fishing rights, and U.S. designs on making Canada part of the Union.

E. All fit

Directions : Two paragraphs with a blank space are provided in each of the following questions. Fill in the blank space with the most appropriate one out of the four options given below, taking into consideration the consistency and compatibility of the two paragraphs. If none of the given options seems appropriate to fill in the blank space, choose option (E) as your answer choice.

9.

a. Nuclear energy is a powerful and controversial source of electricity that is generated through the process of nuclear fission.

b. _____.

c. The key advantage of nuclear energy is its high energy density, which means that a small amount of nuclear fuel can produce a large amount of electricity.

a

A. In this process, the nucleus of a heavy atom, such as uranium or plutonium, is split into smaller fragments, releasing a significant amount of energy.

B. The ongoing debate surrounding nuclear energy involves finding a balance between harnessing its benefits and addressing its risks.

Suggestion

C. With advancements in technology and safety measures playing a crucial role in shaping the future of nuclear power.

D. Additionally, the long-lived radioactive waste generated during the nuclear fission process poses environmental and security challenges.

-ve

E. None of the above.

10.

a. The integration of artificial intelligence (AI) in education has emerged as a transformative force, reshaping traditional learning paradigms and offering innovative solutions to enhance the educational experience. (+ve)

b. _____. (+ve) D

c. These advancements not only streamline administrative tasks for educators but also cater to diverse learning styles, providing students with tailored content and feedback. (+ve)

A. The rapid progress in AI has also sparked conversations about its ethical implications, raising questions about privacy, bias, and the potential impact on employment. (-ve) ×

B. Striking a delicate equilibrium between technological innovation and ethical responsibility remains a paramount challenge as AI continues to reshape the -ve

C. AI-driven diagnostic tools enhance the accuracy of medical assessments, leading to quicker and more effective treatments. OOC

D. AI applications in education encompass a broad spectrum of tools and technologies, from intelligent tutoring systems that personalise learning to virtual classrooms with automated assessments. +ve

E. None of the above.
