Directions : In the following paragraph Twelve sentences which are in their jumbled form are given. Further some of these sentences have a highlighted part which may or may not form a contextually meaningful sentence. You have to swap the highlighted part with the other to make a contextually meaningful sentence and then rearrange those sentences to make a contextually meaningful paragraph.

<u>V is fixed at the SEVENTH place.</u>

M. It allows users to send and receive money, pay bills, and authorize payments in just one step — without needing to **left digital literacy and safe internet practices lagging behind**. Perhaps most importantly, it's free.

N. There's the constant fear of being robbed, or since I'm not a licensed vendor, the local authorities could come and dismantle my stall at any time, he says.

O. He also adds that the rapid pace of digital transformation in the country has **enter bank details or any other personal information**.

P. For the past seven years, Arun Kumar has set up his fruit stall on a busy street in Mumbai.

Q. Although the government and central bank are working on ways to protect UPI users from fraud, at present, if someone falls victim to a scam, **including convincing them to share their UPI PIN**.

R. He also adds that there are no more issues with handling cash or giving change. It has really streamlined both my life and my business.

S. However, in the last four years, at least one aspect of his work has become easier.

T. Being a street vendor isn't easy; it's a tough and demanding job that **requires resilience as each day brings new challenges**.

U. Scammers use various tactics to deceive people, **they must approach their bank for compensation**, which is required to authorize payments, he says.

V. UPI, which was launched in 2016 through a collaboration between India's central bank and the banking sector, is an app-based instant payment system.

W. Before the pandemic, all transactions were done in cash. Now, everyone uses UPI (Unified Payments Interface) — a quick scan of the code and the payment is completed in seconds, he adds

X. While digital payments offer convenience, they also come with risks, warns Shashank Shekhar, founder of the Delhi-based Future Crime Research Foundation.

M. It allows users to send and receive money, pay bills, and authorize payments in just one step — without needing to **left digital literacy and safe internet practices lagging behind**. Perhaps most importantly, it's free.

N. There's the constant fear of being robbed, or since I'm not a licensed vendor, the local authorities could come and dismantle my stall at any time, he says.

O. He also adds that the rapid pace of digital transformation in the country has **enter bank details or any other personal information**.

P. For the past seven years, Arun Kumar has set up his fruit stall on a busy street in Mumbai.

X. While digital payments offer convenience, they also come with risks, warns Shashank Shekhar, founder of the Delhi-based Future Crime Research Foundation.

M. It allows users to send and receive money, pay bills, and authorize payments in just one step — without needing to **left digital literacy and safe internet practices lagging behind**. Perhaps most importantly, it's free.

Question 1:

Which of the following highlighted phrases should the phrase **"left digital literacy and safe internet practices lagging behind"** interchanged with to make a contextually meaningful sentence?

A. including convincing them to share their UPI PIN

B. requires resilience as each day brings new challenges

C. they must approach their bank for compensation

D. enter bank details or any other personal information

E. No correction required.

U. Scammers use various tactics to deceive people, **they must approach their bank for compensation**, which is required to authorize payments, he says.

Question 2:

Which of the following highlighted phrases should the phrase **“they must approach their bank for compensation”** interchanged with to make a contextually meaningful sentence?

A. enter bank details or any other personal information

B. left digital literacy and safe internet practices lagging behind

C. including convincing them to share their UPI PIN

D. requires resilience as each day brings new challenges

E. No correction required.

T. Being a street vendor isn't easy; it's a tough and demanding job that **requires resilience as each day brings new challenges**.

Question 3:

Which of the following highlighted phrases should the phrase **"requires resilience as each day brings new challenges"** interchanged with to make a contextually meaningful sentence?

A. they must approach their bank for compensation

B. including convincing them to share their UPI PIN

C. enter bank details or any other personal information

D. left digital literacy and safe internet practices lagging behind

E. No correction required.

Question 4:

Which of the following options is the pair of the **INTRODUCTORY** statement and the **TERMINAL** statement, respectively, after the correct rearrangement?

A. UX

B. PQ

C. ST

D. WR

E. OQ

Noun Problem However also ufl Noun SS also

P T N S W R V M X U O Q

Suggestion

Arun

gt

Question 5:

Which of the following options is the pair of the **Antepenultimate** statement and the **Penultimate** statement, respectively, after the correct rearrangement?

3rd last

2nd last

A. SN

B. RM

C. XU

D. NT

E. UO

Question 6:

Which of the following combinations is the combination of **THREE CONSECUTIVE** statements after the correct rearrangement?

A. PRQ

B. TVS

C. RVM

D. WXT

E. PTM

Directions : Choose the combination that creates a grammatically and contextually coherent sentence.

Column (I)	Column (II)	Column (III)
A. The manager implemented new policies	(i) in consequence as a result	D. the expedition continued without delay.
B. The research findings were promising	(ii) not to mention not saying about it	E. the team's best efforts to overcome them.
C. The budget proposal was carefully reviewed	(iii) despite inspite of notwithstanding	F. the challenges of adapting to them.

Q1.

(a) ~~A-ii-E~~

~~(b) C-iii-F~~

~~(c) B-i-D~~

(d) A-ii-F

(e) B-iii-E

d

Column (I)	Column (II)	Column (III)
A. The movie received positive reviews A iii E	(i) ergo therefore as a result thus hence	D. the management team decided to implement a comprehensive marketing strategy to boost revenue.
B. The company faced a significant decline in sales over the past quarter	(ii) in so far to that extent	E. some critics found the ending unsatisfying.
C. The city is known for its bustling economy	(iii) albeit although	F. it created more confusion among the staff.

Q2.

(a) C-ii-E

(b) C-iii-F

(c) B-i-D

(d) A-ii-F

(e) ~~B-iii-E~~

Column (I)	Column (II)	Column (III)
A. You are required to submit your reports	(i) henceforth Thus	D. additional resources will be allocated to ensure its completion.
B. The new law aims to reduce carbon emissions;	(ii) to the contrary	E. a bonus this year, as she had not taken a break in months.
C. She decided to take a vacation	(iii) in lieu of instead	F. all meetings will be held virtually to accommodate remote employees.

Q3.

(a) ~~A-iii-F~~

(b) C-iii-E

(c) ~~B-i-D~~

(d) ~~A-ii-F~~

(e) ~~C-i-E~~

b

Column (I)	Column (II)	Column (III)
A. The government has implemented measures to reduce poverty;	(i) be that as it may	D. the wealth gap continues to widen, leaving many people behind.
B. Global temperatures continue to rise due to human activity	(ii) accordingly	E. it provided valuable insights for the upcoming quarter.
C. The weather was unfavorable	(iii) henceforth	F. some governments are still hesitant to implement stricter environmental policies.

Q4.

(a) A-ii-E

(b) C-iii-F

(c) B-ii-D

(d) A-ii-F

(e) B-i-F

Column (I)	Column (II)	Column (III)
A. Canada's universal healthcare system is highly regarded, (+ve)	(i) ergo therefore	D. wait times for certain medical procedures remain a concern. (-ve)
B. There have been improvements in healthcare accessibility in rural areas; (+ve)	(ii) albeit although - Grammar - Tone - Context	E. many people still struggle to afford necessary treatments. (-ve)
C. The team faced numerous obstacles during the project,	(iii) nonetheless yet	F. the outdoor event was moved to an indoor venue.

Q5.

(a) A-ii-D

(b) C-iii-F

(c) B-i-D

(d) A-ii-F

(e) B-iii-E

A/E

Directions : Read the given passage carefully to answer the following questions. Each question will have five alternatives as its answer. Choose the correct option as your answer.

Dr. Mehta: The current global health situation has highlighted a critical issue—many rural areas around the world are effectively blood deserts. These are regions where there is no access to blood transfusion, and people continue to die from conditions like haemorrhage and anaemia because of the lack of sufficient blood for transfusion. It's devastating to think that millions are affected, especially in trauma-related injuries, obstetric haemorrhages, and various anaemias.

Dr. Banerjee: I completely agree, Dr. Mehta. The situation is particularly dire in low-income and middle-income countries (LMICs), where there's an annual shortage of about 102 million blood units. Countries in sub-Saharan Africa and South Asia are all in deficit. It's alarming to realize that in many rural settings, people live hours away from hospitals with stocked blood banks. This lack of access to blood is a critical problem. As you said, people are still dying due to hemorrhage and anaemia in these blood deserts.

Read

1:30 min

Dr. Mehta: That's right. And to make matters worse, the traditional blood banking system, which is both logistically complex and expensive, just isn't feasible in many of these settings. We really need innovative solutions. One of the most promising solutions discussed by experts recently is the idea of civilian walking blood banks. This involves calling on community members for emergency blood donation in situations where immediate transfusion is required. The blood is then tested using rapid diagnostic tools before transfusion, ensuring it's safe.

Dr. Banerjee: Yes, I agree. Walking blood banks could make a big difference in these emergencies. Another method worth considering is intraoperative autotransfusion (IAT), which collects a patient's own blood during surgery, filters it, and then returns it to the patient. This technology is particularly useful in the operating room where major blood loss happens. But we also need to look at drone-based blood delivery (DBD), which is gaining traction.

Drones can help distribute blood from central hubs to rural areas, bypassing the logistical barriers in hard-to-reach regions.

Dr. Mehta: Absolutely. The idea of drone-based blood delivery is revolutionary. It could potentially reduce the time it takes to deliver blood to remote areas, saving lives in critical moments. But as you mentioned earlier, all of these strategies are still in their early stages, and their suitability to different blood deserts remains unclear. The recent hybrid seminar on this topic, attended by 17 international experts, really shed light on these promising strategies. The experts also discussed how to create a policy framework to address the knowledge gaps.

Dr. Banerjee: Right. And it's not just about creating new technologies. The challenge also lies in defining what a blood desert is and determining the specific needs of each region. The experts who met discussed how we need contextually appropriate strategies. For example, in some regions, walking blood banks might work better, while in others, drone delivery could be more effective.

It's important that we find the right fit for each blood desert's unique circumstances. I think interdisciplinary collaboration, including clinicians, policymakers, and researchers, is key to finding solutions.

Dr. Mehta: Exactly. The goal is not just to have new technologies but also to ensure that they are implemented in a way that suits each area's specific challenges. That's why it's important to keep researching these strategies and develop a strong policy agenda. Only then can we make a significant difference in **alleviating** the crisis in blood deserts and saving millions of lives.

Dr. Banerjee: Absolutely. Moving forward, we need to focus on identifying more blood deserts, understanding their unique needs, and prioritizing the implementation of these strategies. It's an urgent issue, and the time to act is now.

That’s why it’s important to keep researching these strategies and develop a strong policy agenda. Only then can we make a significant difference in **alleviating** the crisis in blood deserts and saving millions of lives.

6. Which of the following words can replace the word "**alleviating**" in the passage?

(a) exacerbating

(b) mitigating

(c) perpetuating

(d) stimulating

(e) None of these

7. What key challenge does Dr. Banerjee emphasize in the context of introducing technologies like walking blood banks and drone-based blood delivery in rural settings?

(a) The technological complexity of these systems

(b) The lack of trained personnel to manage the systems

(c) Defining what constitutes a "blood desert" and tailoring strategies to each region's needs

(d) The high costs associated with implementing these technologies

(e) The reluctance of rural communities to adopt new technologies

8. What does Dr. Mehta imply about the future of strategies such as walking blood banks and drone-based blood delivery?

(i) Their long-term impact remains uncertain and will require further research

(ii) They can only work in specific geographic areas

(iii) Their feasibility in low-income countries is questionable due to costs

(a) Both (i) and (ii)

(b) Only (ii)

(c) Only (i)

(d) Both (ii) and (iii)

(e) All of (i), (ii) and (iii)

9. Which of the following is most likely the focus of the hybrid seminar mentioned by Dr. Mehta?

(a) Evaluating the overall effectiveness of traditional blood banks

(b) Discussing the regulatory frameworks for new blood donation methods

(c) Exploring the use of drones for medical supply deliveries

(d) Addressing the challenges of implementing civilian walking blood banks and drone delivery

(e) Analyzing the role of policymakers in the healthcare system of LMICs

d

10. Which of the following sentence(s) can be **inferred** from the passage?

(i) The lack of access to blood in rural areas is a major factor contributing to preventable deaths from conditions like anaemia and haemorrhage.

(ii) The potential success of drone-based blood delivery relies solely on technological advancements and not on local infrastructure.

(iii) Interdisciplinary collaboration, including the involvement of clinicians, policymakers, and researchers, is critical to finding effective solutions for blood deserts.

(a) Both (i) and (ii)

(b) Only (ii)

(c) Only (i)

(d) Both (i) and (iii)

(e) None of these

11. Which of the following **titles** best suits the passage?

Learning
→ Improvement
→ Show up everyday
→ Practice
→ Beat Laziness
→ To be Thankful
→ To think positive
→ To work hard

(a) "Innovative Solutions for Blood Shortages in Rural Areas"

(b) "The Challenges of Blood Delivery in Low-Income Countries"

(c) "Addressing Blood Deserts: Strategies for Saving Lives"

C

(d) "The Rise of Walking Blood Banks: A Global Health Solution"

(e) "The Role of Technology in Overcoming Blood Transfusion Barriers"
