INFERENCE BASED QUESTIONS

Passage [Ramesh went to hospital and came back after five days. [He recovered completely].

Inference → (1) Ramesh was not well

✓ (2) The treatment that Ramesh got in hospital worked

✓ (3) Ramesh will not need to go to hospital again.

(4) Ramesh' parents are very happy

Passage + Understanding

Question 1:

Inference: The aggressive expansion of social media platforms has reshaped political discourse, often amplifying misinformation and deepening political divides.

[I]

Social media has democratized information, enabling citizens to voice their opinions and engage directly with political leaders. However, this open-access platform has also become fertile ground for misinformation campaigns. Algorithms prioritize content that generates engagement, often favoring sensational and divisive posts. Studies have shown that false political information spreads more rapidly than verified news, leading to widespread misconceptions among the public. The anonymity of online interactions further exacerbates this problem, as users are emboldened to share inflammatory content without accountability.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 1:

Inference: The aggressive expansion of social media platforms has reshaped political discourse, often amplifying misinformation and deepening political divides.

[II]

modern

clear

The political impact of social media is evident in election campaigns worldwide. Politicians and political parties have adopted sophisticated digital strategies to reach voters and mobilize support. While these platforms provide a valuable channel for political communication, they also allow for targeted disinformation campaigns that divide the people. Social media companies have come under fire for failing to adequately police harmful content or prevent foreign interference in democratic processes.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 1:

Inference: The aggressive expansion of social media platforms has reshaped political discourse, often amplifying misinformation and deepening political divides.

[III]

contrast (-ve) (+ve) important

Despite concerns, social media has played a crucial role in political activism, particularly for marginalized groups. Grassroots movements have successfully used these platforms to raise awareness about social justice issues and hold leaders accountable. However, the reliance on social media for activism is a double-edged sword, as governments and political actors can use the same tools for surveillance and repression. Balancing the benefits of digital engagement with the risks posed remains a significant challenge for democratic societies.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

c

Question 2:

huge

Inference: Climate change poses a significant threat to global food security by disrupting agricultural systems and reducing crop yields.

[I] deep

Climate change

Rising global temperatures and erratic weather patterns have had profound effects on agriculture. In regions that once had predictable rainfall patterns, farmers are now facing prolonged droughts and sudden, intense storms that destroy crops. Heatwaves are reducing the viability of staple crops such as wheat and maize, while invasive pests are thriving in warmer climates, further jeopardizing food production. Scientists warn that without drastic changes in agricultural practices, global food supplies will become increasingly unstable.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 2:

Inference: Climate change poses a significant threat to global food security by disrupting agricultural systems and reducing crop yields.

[II]

The economic consequences of climate change on agriculture are already being felt. Small-scale farmers in developing countries are particularly vulnerable, as they lack the resources to adapt to changing environmental conditions. As crop yields decline, food prices rise, disproportionately affecting low-income populations. Efforts to provide financial and technical assistance to these farmers have been insufficient, and many are abandoning farming altogether.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 2:

Inference: Climate change poses a significant threat to global food security by disrupting agricultural systems and reducing crop yields.

Problem

Problem – Solution

[III]

Technological advancements in agriculture, such as drought-resistant seeds and precision farming, offer hope for mitigating the impact of climate change. However, the adoption of these technologies has been uneven, with wealthy nations benefiting more than poorer ones. International organizations have called for increased investment in climate-resilient agricultural practices, but political and financial hurdles remain.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Problem – Solution

(e)

Question 3:

Inference: The rapid growth of urban centers has led to a crisis in public transportation systems, negatively impacting commuters' quality of life.

[I]

increase

As urban populations swell, existing public transportation systems have struggled to keep pace with demand. Overcrowded buses and trains have become the norm in many metropolitan areas, leading to longer commute times and heightened commuter stress. The lack of investment in infrastructure maintenance has resulted in frequent breakdowns and service disruptions, further aggravating the situation.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 3:

Can't be inferred

Inference: The rapid growth of urban centers has led to a crisis in public transportation systems, negatively impacting commuters' quality of life.

Inference

[II]

The environmental impact of inefficient public transportation systems is significant. With inadequate public transit options, many commuters have turned to private vehicles, contributing to traffic congestion and higher carbon emissions. Air pollution levels in some major cities have reached hazardous levels, prompting calls for urgent reforms in urban transportation planning.

Paragraph Two

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 3:

Inference: The rapid growth of urban centers has led to a crisis in public transportation systems, negatively impacting commuters' quality of life.

Probl

[III]

Some cities have attempted to address the public transportation crisis created by fast growing cities by investing in smart transportation technologies, such as real-time tracking and electric buses. However, these initiatives often face bureaucratic hurdles and budget constraints, limiting their effectiveness. Until comprehensive reforms are implemented, things will become worse day by day.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 4:

Inference: Economic globalization has led to the exploitation of workers in developing countries by multinational corporations.

[I]

Many multinational corporations have relocated their manufacturing operations to developing countries, where labor costs are lower, and regulatory oversight is often weaker. Workers in these regions are frequently subjected to poor working conditions, long hours, and inadequate wages. Reports of child labor and unsafe factory environments have sparked international outrage and calls for corporate accountability.

Which paragraph(s) support the inference?

(a) Only [I]
(b) Both [I] & [III]
(c) Both [II] & [III]
(d) Both [I] & [II]
(e) None of the options

Question 4:

Inference: Economic globalization has led to the exploitation of workers in developing countries by multinational corporations.

exploit

[II]

Supporters

Proponents of globalization argue that it has created job opportunities and contributed to economic growth in developing countries. They contend that foreign investment has led to technological advancements and improved living standards. However, critics point out that the benefits are often concentrated among political elites and large corporations, with little trickle-down effect for ordinary workers.

Which paragraph(s) support the inference?

(a) Only [I]
(b) Both [I] & [III]
(c) Both [II] & [III]
(d) Both [I] & [II]
(e) None of the options

Question 4:

Inference: Economic globalization has led to the exploitation of workers in developing countries by multinational corporations.

[III]

Efforts to address labor exploitation have included the introduction of international labor standards and corporate social responsibility initiatives. While some companies have made genuine efforts to improve working conditions, many continue to prioritize profit over worker welfare. Activists argue that without stronger enforcement mechanisms, exploitation will remain prevalent. Corporations move to developing countries to hire staff and earn profits but they don't work towards the welfare of their workers.

Which paragraph(s) support the inference?

(a) Only [I]
(b) Both [I] & [III]
(c) Both [II] & [III]
(d) Both [I] & [II]
(e) None of the options

Question 5:

Inference: The privatization of essential public services often leads to reduced access and affordability for low-income populations.

[I]

In many countries, governments have privatized essential services such as healthcare, education, and public utilities to reduce fiscal burdens and improve efficiency. While private companies have introduced innovations and customer-oriented practices, they often prioritize profit over accessibility. As a result, service costs have risen, and low-income families are frequently priced out of essential services.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [II]
(c) Both [I] & [III]
(d) Both [II] & [III]
(e) None of the options

Question 5: mostly

Inference: The privatization of essential public services often leads to reduced access and affordability for low-income populations.

[II]

Proponents of privatization argue that competition in the private sector drives improvements in service quality and efficiency. However, in sectors where natural monopolies exist—such as water and electricity—competition is limited, and private providers may exploit their market power to increase prices. Regulatory agencies tasked with protecting consumers often lack the resources or authority to effectively enforce price controls and service standards.

specific sectors

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [II]
(c) Both [I] & [III]
(d) Both [II] & [III]
(e) None of the options

I often wake up at 6am

On Tuesdays I wake up at 6am.

Question 5:

Inference: The privatization of essential public services often leads to reduced access and affordability for low-income populations.

Problems

[III]

Solution

Some governments have attempted to balance privatization with social welfare by introducing subsidies and public-private partnerships. These initiatives aim to ensure that essential services remain accessible to all citizens. However, implementation challenges and bureaucratic procedures have often undermined these efforts, limiting their effectiveness.

There are problems with private — Problem — Solution — why

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [II]
(c) Both [I] & [III]
(d) Both [II] & [III]
(e) None of the options

(e)

Problems

Question 6:

grows

Inference: Political populism often thrives during periods of economic uncertainty and social discontent.

[I]

Economic crises have historically created fertile ground for the rise of populist leaders who promise to restore prosperity and protect the interests of "ordinary people." In many cases, these leaders gain support by blaming economic woes on external factors, such as globalization, immigration, or international financial institutions. This rhetoric often resonates with citizens who feel left behind by traditional political elites.

discontent

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 6:

Inference: Political populism often thrives during periods of economic uncertainty and social discontent.

[II]

Social discontent, fueled by rising inequality and perceived cultural threats, has further contributed to the appeal of populist movements. Populist leaders frequently position themselves as outsiders who challenge the political establishment and defend the "common people" against corrupt elites. Their campaigns often focus on emotionally charged issues rather than detailed policy proposals. They target the precariousness of economy and promise the citizens to help them come out of the problem.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options

Question 6:

Inference: Political populism often thrives during periods of economic uncertainty and social discontent.

nimishaa1710@gmail.com

[III]

Despite their initial appeal, populist leaders often face criticism for failing to deliver on their promises. Economic policies based on protectionism and nationalism can lead to trade disruptions and fiscal instability. Nevertheless, the underlying social grievances that fueled their rise often persist, creating a cycle of political polarization.

Which paragraph(s) support the inference?

(a) Only [II]
(b) Both [I] & [III]
(c) Both [I] & [II]
(d) Both [II] & [III]
(e) None of the options
