CLOZE TEST

Directions (1-6): A paragraph is given	
below with six blanks. Below, six	
different phrases are also given, which	
will fill these blanks and make a	
coherent passage. You must find the	
correct place for these phrases and fill	
in the blanks.	

India shouldn't fret over US President Donald Trump telling Apple Inc's care of iPhone sales in India seems CEO Tim Cook not to make the country its next major manufacturing-cummore like wishful thinking. And India export hub after China. "We put up with all the plants you built in China for must prove just that — through years. (m) 7. Trump claims to have said. Delhi mustn't take that stable policies, <u>(r)</u> by expanding comment too seriously. Cook is ultimately accountable to the shareholders both production capacity and the of Apple, which now makes about 40 million out of its 220 million-odd local supplier base. iPhones sold globally in India, and the balance from China. The 435261 1. making it worthwhile for Apple Cupertino-headquartered tech giant's plans to expand its operations in to deepen its engagement India are purely (n) and the perceived need to diversify supply chains 2. a preferred investment from China as part of a larger geopolitical risk mitigation strategy. These destination for not just Apple are business decisions, **5** (o). , however powerful. India's focus should 3. a function of the costbe on making itself __(p) 2, but all global companies that made China competitiveness of assembling their factory to produce for the world. That would mean going beyond handsets here 4. we are not interested in you assembling to creating a full-fledged manufacturing ecosystem — of the sort already existing in India's automotive and ancillary sectors and building in India needing replication in industries such as smart phones, computers and 5. not made overnight or unmade consumer electronics. All this requires economies of scale, (q), like at the whim of one person 6. which India can partly offer China's. But true cost-competitiveness and operational scale-up comes through its largely domestic only from making for the domestic as well as global market. Trump's exhortation to Cook to confine Apple's make-in-India plans to only taking market

India shouldn't fret over US President Donald Trump companies that made China telling Apple Inc's CEO Tim Cook not to make the country their factory to produce for its next major manufacturing-cum-export hub after China. the world. That would mean "We put up with all the plants you built in China for years. going beyond assembling to __(m)__," Trump claims to have said. Delhi mustn't take creating a full-fledged that comment too seriously. Cook is ultimately manufacturing ecosystem accountable to the shareholders of Apple, which now of the sort already existing in makes about 40 million out of its 220 million-odd iPhones India's automotive and sold globally in India, and the balance from China. The ancillary sectors and Cupertino-headquartered tech giant's plans to expand its operations in India are purely ___(n)__ and the perceived need to diversify supply chains from China as part of a larger geopolitical risk mitigation strategy. These are Subtvette business decisions, __(o)_ , however powerful. India's focus should be on making itself __(p)__, but all global

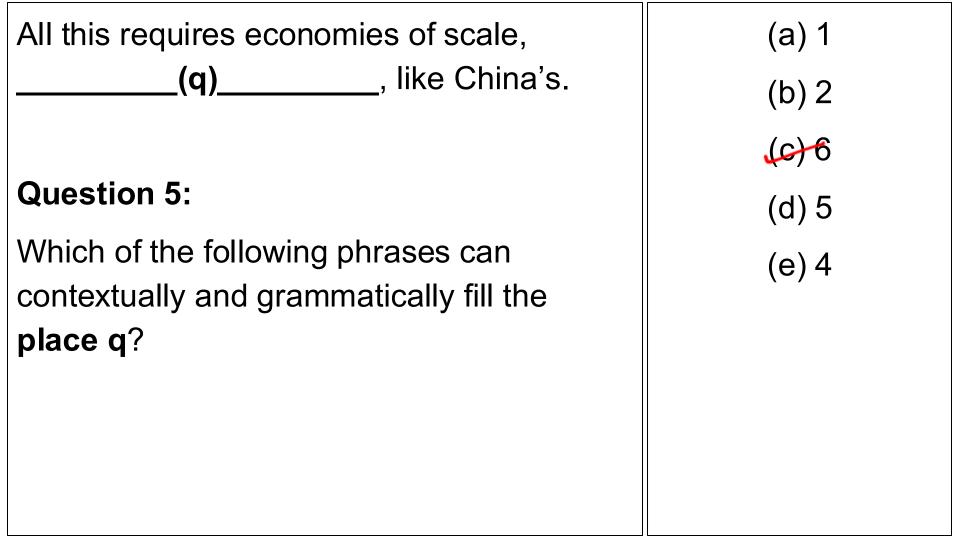

needing replication in industries such as smart phones, computers and consumer electronics. All this requires economies of scale,(q)_, like China's. But true cost-competitiveness and operational scale-up comes only from making for the domestic as well as global market. Trump's exhortation to Cook to confine Apple's make-in-India plans to only taking care of iPhone sales in India seems more like wishful thinking. And India must prove just that — through stable policies,(r)_ by expanding both production capacity and the local supplier base. 1. making it worthwhile for Apple to deepen its engagement 2. a preferred investment destination for not just Apple 3. a function of the cost-competitiveness of assembling handsets here	4. we are not interested in you building in India 5. not made overnight or unmade at the whim of one person 6. which India can partly offer through its largely domestic market
